Summary

Experienced .NET Developer with a strong background in .NET Core , REST API and GraphQL's development. Skilled in integrating third-party services such as Zoho, QuickBooks, and Stripe. Proficient in Blazor Server and WebAssembly, with expertise in various architectures including N-tier and clean architecture. Experienced in working with databases such as SQL Server, Postgres etc. Actively seeking new opportunities to leverage skills and contribute to innovative projects

Experience

Dotnet Developer

JMM TECHNOLOGIES

Aug 2023 - Present (1 year 4 months)

- * **.NET Core:** Developed applications using the .NET Core framework, leveraging its cross-platform capabilities and modern development features to create scalable and high-performance solutions.
- * **Blazor:** Utilized Blazor for building interactive and dynamic web applications, enabling seamless integration of C# code with web technologies like HTML, CSS, and JavaScript.
- * **Blazor in Desktop Apps:** Integrated Blazor applications into desktop environments, allowing for the use of web technologies within desktop applications. This approach enabled the creation of modern and interactive user interfaces in desktop applications.
- * **REST API & GraphQL:** Designed RESTful APIs for standardized data exchange and implemented GraphQL APIs for flexible, client-specific data querying.
- * **GraphQL Subscription for Notifications:** Set up GraphQL Subscriptions to enable real-time notifications, enhancing user engagement with live updates.
- * **Background Jobs with Hangfire:** Utilized Hangfire to manage background jobs, ensuring tasks run reliably in the background for improved application performance and user experience.
- * **DBMS (EF Core & Dapper):** Used both Code-First and DB First Approach.
- * **Third-Party Integrations:** Successfully integrated third-party services such as Zoho, QuickBooks, and Stripe into applications, enabling seamless functionality and data exchange between systems.
- * **Third-Party Authentication Integration:** Integrated third-party authentication services such as Azure AD, Google, and Facebook authentication into applications, enabling users to log in using their existing accounts from these providers.
- * **Clean Architecture and N-tier Architecture:** Designed and implemented applications using clean architecture and N-tier architecture principles, ensuring separation of concerns, maintainability, and scalability of the applications

* **xUnit Testing:** Developed and executed xUnit tests in Visual Studio to verify the functionality and performance of code, ensuring high-quality software development practices.

Junior Dot net Developer

Tech Forward (SMC-PRIVATE) LTD

Aug 2022 - Jul 2023 (1 year)

- **Dynamic Web Applications:** Developed and maintained dynamic web applications using C#, ASP.NET Web Forms, and SQL Server, ensuring high performance and scalability of the applications.

- **Collaboration with Cross-Functional Teams:** Collaborated closely with cross-functional teams to conceptualize, design, and implement new features, enhancing product functionality and improving the overall user experience.

- **Mailchimp Email Integration:** Integrated Mailchimp for email marketing campaigns, enabling targeted and personalized communication with users.

- **Webhooks:** Implemented and managed webhooks to receive real-time notifications and data updates, enhancing application functionality and integration capabilities.

C# Developer

VR Developer - Charsadda

Nov 2021 - Jun 2022 (8 months)

- **Desktop Application Development:** Designed and developed desktop applications using .NET Framework, C#, and ADO.NET, ensuring compatibility and high performance. These applications provided users with intuitive interfaces and seamless functionality.

- **Database Management:** Managed and maintained databases using SQL Server, ensuring data integrity and security. Implemented database optimizations and backup strategies to ensure data reliability and availability.

- **Crystal Reports Implementation:** Implemented Crystal Reports for comprehensive reporting functionalities, providing valuable insights for informed decision-making. These reports were integrated into the desktop applications to enhance business intelligence capabilities.

Education

Bacha Khan University Charsadda, Pakistan

BS, Computer Science

Sep 2017 - Oct 2021

Skills

C# • Crystal Reports • .NET Framework • Databases • xUnit Testing • Testing • AzureAD • Blazor • Microsoft SQL Server • Blazor (Server & Webassembly) • Postgres • Dapper • Hangfire
